

The Georgia Environmental Protection Division has declared a level 1 drought due to ongoing dry conditions in much of north Georgia including Cobb County.

Let's be good stewards of our water! We don't know how long the dry weather will continue. Rainfall may return to normal, but we need to take reasonable measures to be responsible stewards of water and to be prepared for the possibility this is a long-term drought.

- Remember, outdoor watering is should be limited to the hours between 4 p.m. and 10 a.m.
- Be conservation minded. For tips and saving ideas go to ***mydropcounts.org***
