

City of Marietta Employees Pension Plan

Investment Performance Analysis

For Period Ended
June 30, 2015

We have compiled the accompanying summary of the market value, performance statistics and performance results of City of Marietta Employees Pension Plan as of June 30, 2015. Our responsibility is to evaluate the performance results of the investment advisors or unregistered money managers through comparisons with market indices and other universe performance data deemed appropriate and to make observations and recommendations thereon.

We performed time-weighted rates of return and internal rate of return calculations in accordance with standards recommended by the CFA Institute. The calculations performed are based on information provided to us by the custodians, administrators, investment advisors, and/or unregistered money managers. Our approach is to analyze transactions reflected in the custodian and/or administrator statements as well as review the audited market values of the portfolio. This provides us with a reasonable basis, not absolute, that the investment information presented is free from a significant misstatement. We believe that our method of evaluating and measuring performance results contained herein provides us a reasonable basis for our observations and recommendations.

The investment information referred to above presents the market value as of June 30, 2015 and the performance results of the investment advisors or unregistered money managers for the calendar quarter. Based on our procedures, nothing came to our attention that would cause us to believe the information is significantly misstated; however, we do not warrant the complete accuracy of the information.

GAVION does not provide legal or tax advice to clients. All clients with tax considerations, including the effect of UBTI resulting from alternative investment strategies, are strongly urged to consult their tax advisers regarding such issues. A copy of GAVION's current Form ADV Part II may be obtained by contacting the firm's compliance department at (901)-761-8080.

Certain of the information contained herein: (1) is proprietary to third party content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Third party content providers are not responsible for any damages or losses arising from any use of this information. We urge you to compare the GAVION reported performance information presented in this report against the account statements you receive from your custodian or other third party statement providers.

Past performance is no guarantee of future results.

Investment Manager Analysis

Eagle Capital Management

June 30, 2015

Eagle's decision-making process is a bottom-up focus on companies undergoing significant change. They are looking for management teams with a vision to meaningfully change the company over the next three to five years. They must understand the corporation's strategy, evaluate it, judge management's record and ability to execute and ensure that they have the necessary resources. They then confirm that the company is undervalued. Their universe is ranked from companies that they know from adjacent opportunities and from dialogues with cutting-edge thinkers in different industries. While they use databases to highlight mispriced stocks, they do not take reported numbers at face value. Almost all of their value-added comes from original research. Frequent meetings with management, other employees and competitors, suppliers, and customers are integral to their process.

Seizert Capital Partners

June 30, 2015

Seizert Capital Partners believes that the stock market is inefficient and that sentiment or emotion creates undervaluation and overvaluation of stocks relative to their intrinsic value. They believe that this undervaluation can be identified and that portfolios can be constructed to allow for the upward revision process and excess returns. Because expectations of this group are generally conservative, the risks associated with business execution are lower than the more expensive counterparts of the market. They believe that investing in undervalued stocks represents the best and most consistent way to capture an attractive upside/downside relationship that is available in the market. Seizert believes that management behaviors of conservative capital deployment, shareholder friendly activities, and conservative and transparent reporting practices are consistent with solid execution and are key to unlocking the undervaluation of these stocks. They believe that capital growth and protection is best supported by a relatively concentrated investment of capital. Protecting capital in down markets is paramount.

Westfield Capital All Cap

June 30, 2015

Westfield is a fundamental, bottom-up manager investing in earnings growth stocks due to their conviction that stocks follow earnings progress and that they offer the best opportunity for superior real rates of return. Westfield generates themes to drive investment ideas in specific areas throughout the capitalization spectrum. This is particularly the case in cyclical sectors such as energy. The firm does utilize screens; however, most of their themes are driven from their understanding of the sectors that each analyst covers. The analysts' network and industry knowledge are the most critical components of the idea generation stage, and as bottom up investors, Westfield does not use the benchmark as a part of the portfolio construction process.

Energy Opportunities Capital

June 30, 2015

Orleans Capital Management and Simmons & Co. formed Energy Opportunities Capital Management, L.L.C. (EOCM) as a separate entity to manage the Energy Opportunities and the related Alternative Energy investment strategies. The Energy Opportunities strategy is a long only equity investment vehicle designed to take advantage of current energy market fundamentals and the continued energy upcycle. The strategy consists of separately managed accounts with identical holdings. Investment decisions are based upon macro energy fundamentals as well as company specific data gathered and analyzed by Simmons. The portfolio consists of publicly traded securities and currently is comprised of 35 holdings. Market capitalizations of these holdings range from \$400 million to in excess of \$6 billion. Security selection is designed to take advantage of the flow of economics within the energy sector by emphasizing certain energy subsectors (drillers, oil service, refiners) and to focus on companies with superior earnings growth.

June 30, 2015

Sage Advisory employs a value-oriented comprehensive portfolio management approach blending active duration management, market sector rotation and undervalued security selection. Cash will be used for duration adjustment purposes or as part of a defensive mode, which could be as high as 30%. The strategy looks to provide consistent quarterly total returns while minimizing downside risk in any environment.

Orleans Capital Management Investment Grade Fixed Income

June 30, 2015

The Orleans Capital Management Investment Grade Fixed Income strategy adds value through sector and security selection designed to create an enduring yield advantage over the applicable benchmark without a material variation in quality, convexity, or other portfolio characteristics. In doing so, they overweight both the corporate and mortgage-backed sectors and underweight lower yielding government agencies and treasuries.

Victory Investment Grade Convertible Securities

June 30, 2015

Process focuses on the intrinsic value of the underlying common stock as well as on the convertible security itself. The underlying equity analysis looks for the best combination of intrinsic value, statistical cheapness and earnings revision. The underlying fixed income analysis encompasses financial statement factors in addition to trends of pertinent financial ratios such as pre-tax interest coverage, current ratio, return on equity and profit margins. Convertible characteristics they analyze include quality, intrinsic value, conversion premium, break-even, investment value, yield advantage, call and put features, liquidity, and sensitivity/horizon analysis. They purchase when the underlying equity exhibits superior valuation characteristics, coupled with the most compelling combination of statistical cheapness and earnings revision; underlying bond exhibits solid cash flow or improving fundamentals; and convertible particulars are attractive.
