Undeveloped properties at 120 and 150 Florence Street

Portion of property at 833 Campbell Hill Street to be used for second medical office building

STAFF ANALYSIS

Location Compatibility

The applicant, HR Acquisition I Corporation, is requesting to rezone five (5) parcels (833 & 900 Campbell Hill Street and 100, 120, & 150 Florence Street) to develop the 4.715-acre property at 833 Campbell Hill Street for a second medical office building and a 2.47-acre parking lot at 900 Campbell Hill Street and 100, 120, and 150 Florence Street. The property at 833 Campbell Hill Street is currently used as a medical office building (Kenmar), while the properties on the north side of Florence Street remain vacant. Adjacent properties to the north, west, and south are also zoned OI (Office Institutional); while properties to the east are a mixture of CRC (Community Retail Commercial) and OI.

Use Potential and Impacts

The applicant wishes to rezone the subject properties from RHR (Residential High Rise) and OI to OI to develop a second medical office building at 833 Campbell Hill Street property. The parking area around the two buildings will have 308 parking spaces. The four (4) parcels on the north side of Florence Street will be combined and developed as a parking lot with 224 parking spaces. The applicant has stated the second medical office building would be approximately 85,000 square feet and a maximum of four (4) stories in height. Parking for the two (2) medical office buildings (proposed and existing) would be redesigned to provide connectivity, both vehicular and pedestrian, between the two tracts of land. Access to the medical office complex would be from Campbell Hill Street, White Street, and Florence Street, while access for the related parking area would be from Marble Mill Road and Florence Street as shown on the submitted site plan.

Within the City ordinance, each area of a site that abuts public roadway, including public and private streets or improved accessways providing access to the interior of a development, must provide a planted border parallel to the roadway as described below:

TABLE G-1a. REQUIREMENTS FOR PLANTED STRIP/BORDER AREAS
 (excluding single family lots in residential subdivisions)

Public Street	10-foot minimum width
	Minimum one tree per 30 lineal feet of roadway
	Medium and large canopy trees only
	3" minimum caliper

The subject properties abut public roadway on both tracts and therefore will require a ten (10) foot landscape strip with a minimum one tree per thirty (30) lineal feet of roadway that is at least three (3) inch minimum caliper (medium/large canopy only). The site plan provided has shown the planted strip/border areas on both tracts – the applicant will need to make sure that all trees in the planted border/strip areas are approved “Road Frontage Street” trees in Table G-2 of City ordinance. In addition, planter islands are required in the interior or the parking area, and a maximum of 12 parking spaces in a row are permitted without a planter island.

The properties at 900 Campbell Hill Street, 120 and 150 Florence Street have a future land use designation of CAC (Community Activity Center) while the properties at 833 Campbell Hill and 100 Florence Street have a future land use designation of CSI (Community Service and Institutional). CAC is designed for retail and service needs and should be located along collector and arterial streets; Campbell Hill and Florence Streets are classified as local streets. CSI is intended for governmental, institutional, and non-profit functions. As a result, this request to rezone from OI and RHR to OI would be supported by the City’s Comprehensive Plan.

Environmental Impacts

The development of these properties should not have a substantial environmental impact, as there is no indication of any streams, wetlands, floodplain, or endangered species on site. The project will be expected to comply with the City’s stormwater and landscaping ordinances.

Though not stated on the site plan, the maximum impervious surface coverage is 80% for properties zoned OI.

Economic Functionality

The property at 833 Campbell Hill Street has been operating as a medical office building since 1989 and functions as zoned. The property at 100 Florence Street was previously used as a place of assembly and storage space until last year according to the Business License department. The applicant plans to demolish the current structure at 100 Florence Street and that property will be included in the resulting overflow parking lot. The building that had been located at 120 Florence Street operated as Marietta Dermatology Associates until 2009 when their new facility was built on the adjacent property to the north; the building was demolished in 2015. While the small individual parcels made development difficult, the aggregate size and proximity to Wellstar Kennestone Hospital will allow these combined parcels to be developed under the proposed rezoning.

Infrastructure

Parking is required to be on the same lot with the use it serves, with the following exception:

“If vehicular parking or storage space required cannot be reasonably provided on the same lot on which the principal use is conducted, the Board of Zoning Appeals may permit such space to be provided on other off-street property, provided such space lies within 400 feet of the main entrance of such principal use and meets the storage requirements set forth in 710.07. Such vehicular parking space shall be associated with the permitted use and shall not hereafter be reduced or encroached upon in any manner.”

Since the applicant is requesting to utilize offsite parking on the Florence street parcels, the following variance will be required:

- Variance to allow for off-site parking to meet the minimum parking standards for a property used as medical offices [§716.07 A].

The proposed site plan indicates a total of 532 parking spaces (one parking space for every 300 square feet of building space). The existing Kenmar Medical building has a total of 68,000 square feet whereas the proposed secondary medical office building would be 85,000 square feet – for a total square footage of 153,000 square feet. The parking that is to be provided exceeds the number of parking spaces required by the zoning regulations (510).

City ordinance requires a parking/planter island so as to relieve the expanse of parking, providing shade and channel water runoff; a maximum of twelve (12) spaces in a row are permitted without a planter island. The applicant has not shown all of the required planter/parking islands on the site plan and therefore would require the following variance:

- Variance to waive the planter island requirements [§712.08 G].

Overhead Electrical/Utilities

Any new commercial development utilities will be required to go underground.

History of Property

The property at 900 Campbell Hill Street has been the subject of multiple rezonings; the first in 2015 (Z2015-25) when the property was rezoned from OI (Office Institutional) to CRC (Community Retail Commercial); and then again in 2017 (Z2017-18), when it was rezoned from OI to RHR.

The properties at 120 and 150 Florence Street were rezoned from OI to RHR back in 2017 (Z2017-18) alongside the property at 900 Campbell Hill Street.

Other Issues

An exemption plat to formally combine the properties will be required.

ANALYSIS & CONCLUSION

The applicant, HR Acquisition I Corporation, is requesting to rezone five (5) parcels (833 & 900 Campbell Hill Street and 100, 120, & 150 Florence Street) to develop the 4.715-acre property at 833 Campbell Hill Street for a second medical office building and a 2.47-acre parking lot at 900 Campbell Hill Street and 100, 120, and 150 Florence Street. The property at 833 Campbell Hill Street is currently used as a medical office building (Kenmar), while the properties on the north side of Florence Street remain vacant.

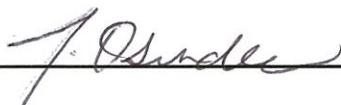

The four (4) parcels on the north side of Florence Street will be combined and developed as a parking lot with 224 parking spaces. The parking area around the two buildings on the 833 Campbell Hill Street parcel will have 308 parking spaces. The applicant has stated the second medical office building would be approximately 85,000 square feet and a maximum of four (4) stories in height. Parking for the two (2) medical office buildings (proposed and existing) would be redesigned to provide connectivity, both vehicular and pedestrian, between the two tracts of land.

The following variances would be necessary to accommodate the applicant’s site plan, as currently proposed:

1. Variance to allow for off-site parking to meet the minimum parking standards for a property used as medical offices [§716.07 A].
2. Variance to waive the planter island requirements [§712.08 G].

The applicant’s agent, J. Kevin Moore, has indicated that he will be submitting a letter of stipulations for the development prior to the zoning hearings.

The properties at 900 Campbell Hill Street, 120 and 150 Florence Street have a future land use designation of CAC (Community Activity Center) while the properties at 833 Campbell Hill and 100 Florence Street have a future land use designation of CSI (Community Service and Institutional). CAC is designed for retail and service needs and should be located along collector and arterial streets; Campbell Hill and Florence Street are classified as local streets. CSI is intended for governmental, institutional, and non-profit functions. As a result, this request to rezone from OI and RHR to OI would be supported by the City’s Comprehensive Plan.

DESCRIPTION OF PROPOSED DEVELOPMENT/PROJECT

The property which is the subject of the Application for Rezoning is two separate tracts, divided by Florence Street. Applicant, HR Acquisition I Corporation (“Applicant”), is also the owner of one of the parcels, being 4.715 acres, located on the westerly side of Campbell Hill Street, and being more particularly known as 833 Campbell Hill Street. This parcel is currently zoned Office/Institutional and is developed and utilized for the existing “Kenmar” medical office building. The second tract is located on the north side of Florence Street and the westerly and southwesterly side of Marble Mill Road, being 2.47 acres, more or less, is presently undeveloped and zoned Residential High-Rise (“RHR”). The Rezoning Application seeks approval of a request to rezone both tracts (collectively the “Property” or the “Subject Property”) from the current Office Institutional and Residential High-Rise (“RHR”) zoning categories to the Office/Institutional (“OI”) zoning category. Applicant is seeking rezoning to redevelop a portion of the 4.715 tract to construct a second medical office building containing approximately 85,000 square feet, and being a maximum of four stories in height. Parking for the two medical office buildings would be re-designed to utilize both tracts, providing connectivity, both vehicular and pedestrian, between the tracts. Access to the medical office complex would be from Campbell Hill Street, White Street, and Florence Street, while access for the related parking area would be from only Marble Mill Road and Florence Street, as shown on the Site Plan submitted with this Application. There shall be extensive landscaping on both tracts.

Applicant also seeks a contemporaneous variance for the 4.715 acre tract to allow for off-site parking on the 2.47 acre tract, as per City Zoning Ordinance.

A detailed letter of agreeable zoning stipulations and conditions will be submitted on behalf of Applicant prior to the hearings before the Planning Commission and City Council.

Applicant is very excited with the opportunity of the redevelopment of the Property to provide a much-needed service to the residents and communities within the City of Marietta and Cobb County.

Zoning Staff and various City Staff and reviewing the City's Rezoning Application Analysis, we have been authorized by the Applicant to submit this letter of agreeable stipulations and conditions which, if the Application for Rezoning is approved, as submitted, shall become a part of the grant of the requested zoning and shall be binding upon the Subject Property. The proposed stipulations are as follows:

- (1) The stipulations and conditions set forth herein shall replace and supersede in full any and all prior stipulations and conditions, in whatsoever form, which are currently in place on the Subject Property.
- (2) Applicant seeks rezoning of the Subject Property from the existing zoning categories of Office Institutional ("OI") and Residential High Rise ("RHR") to the proposed zoning category of Office Institutional ("OI"), with reference to the Site Plan filed with the Application for Rezoning. A reduced copy of the Site Plan is attached as Exhibit "A" and incorporated herein by reference.
- (3) On a portion of the Subject Property comprised of 833 Campbell Hill Street, Applicant proposes to construct a new medical office building, a maximum of four (4) stories in height, and containing a maximum of 85,000 square feet, as more specifically identified on the submitted Site Plan.
- (4) Applicant will provide a maximum overall total of five hundred thirty-two (532) parking spaces (five hundred nine (509) spaces required). There will be a total of three hundred eight (308) surface parking spaces immediately adjacent to the proposed and existing medical office buildings on 833 Campbell Hill Street; as well as a maximum of two hundred twenty-four (224) surface parking spaces in the auxiliary parking area located across Florence Street.
- (5) Applicant agrees to a dedicated pedestrian cross-walk connecting the auxiliary parking area with the medical office buildings, as shown and reflected on the Site Plan. Applicant will work with the City of Marietta Public Works to establish a safe crossing area on Florence Street.
- (6) Applicant agrees to the installation of sidewalk, curb, and gutter, together with a two (2) foot beautification strip, along the frontage of the Subject Property on Marble Mill Road, Campbell Hill Street, Florence Street, and a portion of White Street, as shown and reflected on the submitted Site Plan.
- (7) All landscaping referenced herein; including, but not limited to, the frontage, entrance area, and open space areas, shall be approved by the City of Marietta as

part of the Plan Review Process and incorporated into the overall landscape plan for the proposed development.

- (8) All setbacks, landscape, and buffer areas may be penetrated for purposes of fencing, access, utilities, and stormwater management; including, but not limited to, drainage and detention facilities and any and all slopes or other required engineering features of the foregoing. Any disturbed area shall be restored with comparable plantings as allowed by the City of Marietta or any utility provider.
- (9) Applicant agrees to the following variances for the proposed project:
 - (a) Variance to allow for off-site parking to meet the minimum parking standards for a property used as medical offices; and
 - (b) Variance to waive the planter island requirements.

We believe the requested zoning, together with the referenced Site Plan and the stipulations set forth above, is an appropriate use of the Subject Property while taking into consideration the location of the Property and the uses of properties in the surrounding area. The proposed medical office building, and redevelopment of the surrounding property, will be a quality facility and provide much-needed services to the healthcare community, area residents, and the City. Thank you for your consideration in this request.

With kindest regards, I remain

Very truly yours,

Variance Case #: V2020-31 **Legistar #:** 20200638

City Council Hearing: Wednesday, September 9, 2020 – 7:00 p.m.

Property Owner: Bhullar Holdings, LLC
248 Roswell Street
Marietta, GA 30060

Applicant: MPRC Automotive, LLC d.b.a. Grand Motorcars

Agent: Adam J. Rozen, P.C.

Address: 1860 Roswell Road

Land Lot: 1134 **District:** 16 **Parcel:** 00100

Council Ward: 7A **Existing Zoning:** CRC (Community Retail Commercial)

Special Exception / Special Use / Variance(s) Requested:

1. Variance to increase the allowable impervious surface from 80% to 95%. [*§708.16 (H)*]
2. Variance to allow planter islands in lieu of the 10-foot planted border area along Roswell Road as shown on site plan dated 6/9/20. [*§712.08 (G.2)*]
3. Variance to waive the 10-foot planted border area along the South Marietta Parkway frontage as shown on site plan dated 6/9/20. [*§712.08 (G.2)*]
4. Variance to reduce the landscape buffer as shown on site plan dated 6/9/20. [*§708.16 (I)*]
5. Variance to allow a detention pond within a buffer. [*§710.05 (B)*]
6. Variance to reduce the rear yard setback from 35’ to 11’ for the existing building. [*§708.16 (H)*]
7. Variance to reduce the setback from 2’ to 0’ and allow a 6’ tall chain link fence along the Roswell Road frontage. [*§710.04 (D.1)*]

Statement of Fact

As per section 720.03 of the Comprehensive Development Code of Marietta, the Board of Zoning Appeals may alter or modify the application of any such provision in the Development Code because of unnecessary hardship if doing so shall be in accordance with the general purpose and intent of these regulations, or amendments thereto, and only in the event the board determines that by such alteration or modification unnecessary hardship may be avoided and the public health, safety, morals and general welfare is properly secured and protected. In granting any variance the board of zoning appeals shall designate such conditions in connection therewith as will, in its opinion, secure substantially the objectives of these regulations and may designate conditions to be performed or met by the user or property owner, out of regard for the public health, safety, comfort, convenience, and general welfare of the community, including safeguards for, with respect to light, air, areas of

occupancy, density of population and conformity to any master plan guiding the future development of the city. The development costs of the applicant as they pertain to the strict compliance with a regulation may not be the primary reason for granting a variance.

Criteria:

1. Exceptional or extraordinary circumstances or conditions *are/are not* applicable to the development of the site that do not apply generally to sites in the same zoning district.
2. Granting the application *is/is not* necessary for the preservation and enjoyment of a substantial property right of the applicant, and to prevent unreasonable property loss or unnecessary hardship.
3. Granting the application *will/will not* be detrimental or injurious to property or improvements in the vicinity of the development site, or to the public health, safety, or general welfare.

Staff Review:

Bhullar Holdings, LLC is requesting multiple variances for the property at 1860 (aka 1850) Roswell Road, which operates as Grand Motorcars. The property is approximately three (3) acres, is zoned CRC (Community Retail Commercial), and is located at the southwestern corner of the intersection of Roswell Road and South Marietta Parkway. The Lantern Ridge Apartment complex is the only adjacent private property. Cobb County maps show the entrance drive, Lantern Ridge Drive on the southwestern side of the subject property, as being zoned GC (General Commercial) in Cobb County. The rest of the property is zoned RM-12 in Cobb County.

The issues with this property arose after a substantial amount of unpermitted paving was noticed by city staff late in 2019. A variance request granted in 2013 by the Board of Zoning Appeals had given the owner at the time permission to use gravel for vehicular storage. After a thorough site inspection in October 2019, staff found that most of site had been paved and cleared of all trees, as well as a new chain link fence installed along the Roswell Road frontage, without the proper

permits and approvals. The property owner was contacted and complied with staff's request to have drawings of the site prepared for staff to review. After a plan review by staff, it was determined that the recent work violated the following:

Residential Buffer

The additional paving included the area adjacent to the Lantern Ridge Apartments, which would typically require a forty (40) foot buffer because of the residential zoning. Aerial images from 2018 indicate that the buffer area was unpaved, contained trees and other vegetation, and was not being used for vehicular storage. The applicant is requesting to restore the buffer to twenty (20) feet wide instead of the required forty (40) feet. The submitted plans do not show any trees being replanted, which may be difficult due to the new modular retaining wall and plans to include a bioswale, which requires specific vegetation types that do not always include evergreen trees. A twenty foot buffer without trees would not be a very effective buffer. It should also be noted that a chain-link fence was installed on top of the retaining wall. Buffers are required to include a six (6) foot tall, opaque fence to aid with screening the site from the adjacent residences.

Impervious Surface & Setbacks

Staff has estimated that the site, with the new paving, is approximately 95% covered in impervious surfaces. Prior to the unpermitted work, the site was approximately 65% impervious surface. With the partial restoration of the buffer and installation of some tree islands proposed by the applicant, the impervious surfaces on the site would be reduced from approximately 95% to 88%.

The existing building was built in the early 1980s, according to the Cobb County Tax Assessor's Office, and is only eleven (11) feet from the rear property line. The City's redevelopment clause for nonconforming structures (Section 706) requires the entire site adhere to the Zoning Ordinance if construction costs exceed 50% of the replacement cost of the existing building. Based on the amount of work performed, a buffer and rear setback reduction would be required in order to allow the rear portion of the building remain.

Road Frontages and Tree Protection and Landscaping Ordinance

Street trees had been planted along the property's road frontage as a condition of the previously granted variances. The trees along the southern portion of the Roswell Road frontage were removed as part of the expanded paving project and a new 6' tall chain link fence installed at the right of way line. Street trees installed along the South Marietta Parkway frontage of the property were also removed. The City's Tree Ordinance requires a ten (10) foot wide planted (and unpaved) border area containing one 3" caliper, medium- or large- canopy tree every thirty (30) lineal feet along a road frontage. In lieu of restoring the planted buffer on both the South Marietta Parkway and Roswell Road frontages, the applicant is proposing to install four (4) tree islands in the parking area along Roswell Road.

Further, fencing placed in a front yard of property zoned CRC must be an ornamental or decorative material, no taller than four (4) feet, and set back at least two (2) feet from the right of way. The new chain link fencing does not comply with this requirement.

Also, a substantial portion of the new paving on the South Marietta Parkway extends across the property line into Georgia Department of Transportation (GDOT) right of way. The applicant will need to work with GDOT to correct this issue.

The applicant would be expected to replace the required tree density for the site. Street trees, buffer trees, and trees in parking lot islands all count towards the site density factor, which is 17 units per acre. A 3-acre site would be required to have 51 tree density units. The submitted plans show 15 new trees, which would yield a total of 9 units if they are 3" caliper in size. This would leave a deficit of 42 units; and under the alternative compliance section of the tree ordinance, the applicant could make a payment of \$23,100 to the Tree Fund to make up for that deficit.

Variance History

The Board of Zoning Appeals approved the following variances and stipulations in March 2013:

Variance to waive the minimum standards for parking and driveway surfaces so as to allow parking of vehicles on an untreated hardened surface with the following stipulations:

1. *All boat/RV storage areas must be covered with gravel, slate, stone, or other similar material. However, the material, as well as the size and depth of the material on site, must be approved by the Public Works Director. This material must be in place and approved by Code Enforcement and the Public Works Department prior to obtaining a business license to store boats/RVs on the property.*
2. *Street trees will be planted along the front of the road, but each tree is planted within the legal requirements set forth in the existing Tree Ordinance in the city of Marietta.*
3. *An opaque fence, covered with a dark green or black windscreen in areas except adjacent to street, must be installed along the property line between the subject property and the apartment complex. The fence must be installed within one year of the date of the approved variance.*
4. *The existing/abandoned "JOA Marine" pole sign must be reduced for height and change the fascia within one (1) year of the date of the approved variance.*

City Council approved the following variances in August 2014:

- *Variance to allow a pylon sign and a variance to relocate four street trees to the side yard of the property. (V2014-22)*

Stormwater

It should be noted that the applicant will be required to work with the City's Engineering Division to address any stormwater issues associated with the new paving.

Re: Variance Application of MPRC Automotive, LLC dba Grand Motorcars,
regarding a 3.0± Acre Tract located in Land Lot 1134 and 1171, 16th District, City
of Marietta, Cobb County, Georgia.

Dear Shelby:

This firm is engaged by and represents the applicant MPRC Automotive, LLC doing business as Grand Motorcars ("Applicant") concerning the above-captioned Variance Application being filed contemporaneously herewith. The Application is scheduled to be heard and considered by the City of Marietta Mayor and City Council on September 9, 2020.

The property at issue consists of one parcel at 1860 Roswell Road (also known as 1850 Roswell Road) located on the south east side of Roswell Road at its intersection with Lantern Ridge Drive and along the Georgia DOT right of way of the Marietta Loop/North Marietta Parkway. The subject property is zoned Community Retail Commercial ("CRC") and is in the Community Activity Center ("CAC") which stretches along much of the Roswell Road corridor and identifies the character of this area in and around the subject property. The subject property is also adjacent to nearby Cobb County properties which are zoned and utilized for commercial and multifamily developments which have coexisted with the nearby commercial developments and subject property.

Presently, the subject property is utilized for the Applicant's automobile sales facility which has successfully operated at this location and in the City for a number of years. The current use of the subject property is permitted under the CRC zoning and the owner intends to maintain the current use of the site but seeks approval to allow the site to continue operations in

its current development with modifications to accommodate landscaping and stormwater requirements.

Over the Applicant's ownership and operation of the subject property, it has conducted significant building and site renovations and improvements from its prior use and operations. The former operations allowed dilapidation of the subject property and the office building and operated on a gravel and partially paved parking lot. The Applicant made significant investment and improvements to the site and building as a whole; including maintaining the landscaping of the DOT row along Roswell Street, landscaping along the right of way along the Marietta Loop/North Marietta Parkway, fencing and paving site, and constructed a retaining wall along the rear of the property to protect the integrity of the site as it relates to the residential property to the rear and south of the subject property. The Applicant worked with the adjoining multifamily property owner throughout this process.

However, the improvement exceeds the impervious surface percentage of the site and does not comply with all stormwater management controls and zoning requirements. The purpose of this Application is to modify the site and building improvements to comply with the City Ordinance while recognizing the constraints of the existing conditions.

To do so, the Applicant will remove a significant portion of the paved area of the site for buffering and stormwater management, will install planter islands with street trees and will remove the site improvements from a portion of the DOT right of way which have existed for a number of years. While the Application seeks a number of variances to accommodate the improvements on the site, the site and its development is consistent with and much improved as compared to existing surrounding commercial and industrial uses along Roswell Road; which is an appropriate and positive consideration for the granting of this Variance Application.

Prior to the filing of this Application, the Applicant and its engineering representative, Mr. Steven T. Ellis of Pro Building Solutions and his team, met and corresponded with City Staff regarding the zoning conditions and stormwater management considerations in order to better understand how to comply with the City Ordinance and achieve a mutually beneficial resolution. These discussions continue today and will do so during the pendency of this Application.

Zoning Staff and various City Staff and reviewing the City's Rezoning Application Analysis, we have been authorized by the Applicant to submit this letter of agreeable stipulations and conditions which, if the Application for Rezoning is approved, as submitted, shall become a part of the grant of the requested zoning and shall be binding upon the Subject Property. The proposed stipulations are as follows:

- (1) The stipulations and conditions set forth herein shall replace and supersede in full any and all prior stipulations and conditions, in whatsoever form, which are currently in place on the Subject Property.
- (2) Applicant seeks rezoning of the Subject Property from the existing zoning categories of Office Institutional ("OI") and Residential High Rise ("RHR") to the proposed zoning category of Office Institutional ("OI"), with reference to the Site Plan filed with the Application for Rezoning. A reduced copy of the Site Plan is attached as Exhibit "A" and incorporated herein by reference.
- (3) On a portion of the Subject Property comprised of 833 Campbell Hill Street, Applicant proposes to construct a new medical office building, a maximum of four (4) stories in height, and containing a maximum of 85,000 square feet, as more specifically identified on the submitted Site Plan.
- (4) Applicant will provide a maximum overall total of five hundred thirty-two (532) parking spaces (five hundred nine (509) spaces required). There will be a total of three hundred eight (308) surface parking spaces immediately adjacent to the proposed and existing medical office buildings on 833 Campbell Hill Street; as well as a maximum of two hundred twenty-four (224) surface parking spaces in the auxiliary parking area located across Florence Street.
- (5) Applicant agrees to a dedicated pedestrian cross-walk connecting the auxiliary parking area with the medical office buildings, as shown and reflected on the Site Plan. Applicant will work with the City of Marietta Public Works to establish a safe crossing area on Florence Street.
- (6) Applicant agrees to the installation of sidewalk, curb, and gutter, together with a two (2) foot beautification strip, along the frontage of the Subject Property on Marble Mill Road, Campbell Hill Street, Florence Street, and a portion of White Street, as shown and reflected on the submitted Site Plan.
- (7) All landscaping referenced herein; including, but not limited to, the frontage, entrance area, and open space areas, shall be approved by the City of Marietta as

MOORE INGRAM JOHNSON & STEELE

Ms. Shelby Little, AICP
Zoning Manager
Department of Planning and Zoning
City of Marietta

part of the Plan Review Process and incorporated into the overall landscape plan for the proposed development.

- (8) All setbacks, landscape, and buffer areas may be penetrated for purposes of fencing, access, utilities, and stormwater management; including, but not limited to, drainage and detention facilities and any and all slopes or other required engineering features of the foregoing. Any disturbed area shall be restored with comparable plantings as allowed by the City of Marietta or any utility provider.
- (9) Applicant agrees to the following variances for the proposed project:
 - (a) Variance to allow for off-site parking to meet the minimum parking standards for a property used as medical offices; and
 - (b) Variance to waive the planter island requirements.

We believe the requested zoning, together with the referenced Site Plan and the stipulations set forth above, is an appropriate use of the Subject Property while taking into consideration the location of the Property and the uses of properties in the surrounding area. The proposed medical office building, and redevelopment of the surrounding property, will be a quality facility and provide much-needed services to the healthcare community, area residents, and the City. Thank you for your consideration in this request.

With kindest regards, I remain

Very truly yours,
